## Phase 3: DESIGN THE ENVIRONMENT and THE USER & SYSTEM INTERFACES

### DESIGN THE ENVIRONMENT

#### 1. Using the project description then answer the following questions:

a. With what external systems and databases will the system under development interact?

#### External Systems:

##### 1-GoogleMap API:

- Response Must be Fast so user will not feel bored
- Input is location of User and output is nearest market to user
- Use **HTTPS** protocol for secure connection and data encoding
- User Must open location from his device so no wrong location will Provided

##### 2-External Payment techniques Systems:

- Response Must be Fast so user will not feel bored
- Input is Credit Card Number of User and output is Condition of Payment
- Use https protocol for secure connection and data encoding
- User Must write all right information

---

---

## Databases:

### 1-Mega Store warehouse Database:

- Response Must be Fast so user will not feel bored
- Input is Query about product and output is what he asks for
- Use https protocol for secure connection and data encoding
- Must right query in right way

### 2-Supplier Warehouse Database

- Response Must be Fast so user will not feel bored
- Input is Query about product and suppliers and output is what he asks for Use https protocol for secure connection and data encoding
- Must right query in right way

## **b. What devices will be used for automated inputs and outputs?**

### Devices:

We can use:

- Scanners for barcode
- Use hand-held laser to test and take input
- Must take right barcode if no matching does nothing

---

---

**c. What user-interface technology will be used?**

- User will be off-site
- User use smartphones and Computer with internet
- User devices can have android or windows Linux
- Use web Technologies as our interface design technologies

## **THE USER & SYSTEM INTERFACES**

### **3.Using the system sequence diagrams developed during the analysis phase of your project:**

- a. Identify the various screens and forms that may be needed for the user interface.**

#### **“Search for product” system sequence diagram:**

- 1- home screen as an output screen
- 2-search screen as an input and output screen  
because the output result will be in the same screen

#### **“Buy products” system sequence diagram:**

- 1-my cart screen as an output screen that contain the product to buy
- 2-Address screen as an input screen to enter the address details
- 3-payment method screen as an input screen to choose payment method

---

---

**“Add product to store” system sequence diagram:**

- 1- add product input screen to enter product information
- 2- confirmation as an output response message

**“Return Product to Store” system sequence diagram**

- 1- return product input screen to enter product information
- 2- confirmation as an output response message

all the previous has mapped to website and mobile application screens

**4. From use case diagrams developed during the analysis phase of your project which related to the screens and forms identified in (2.a):**

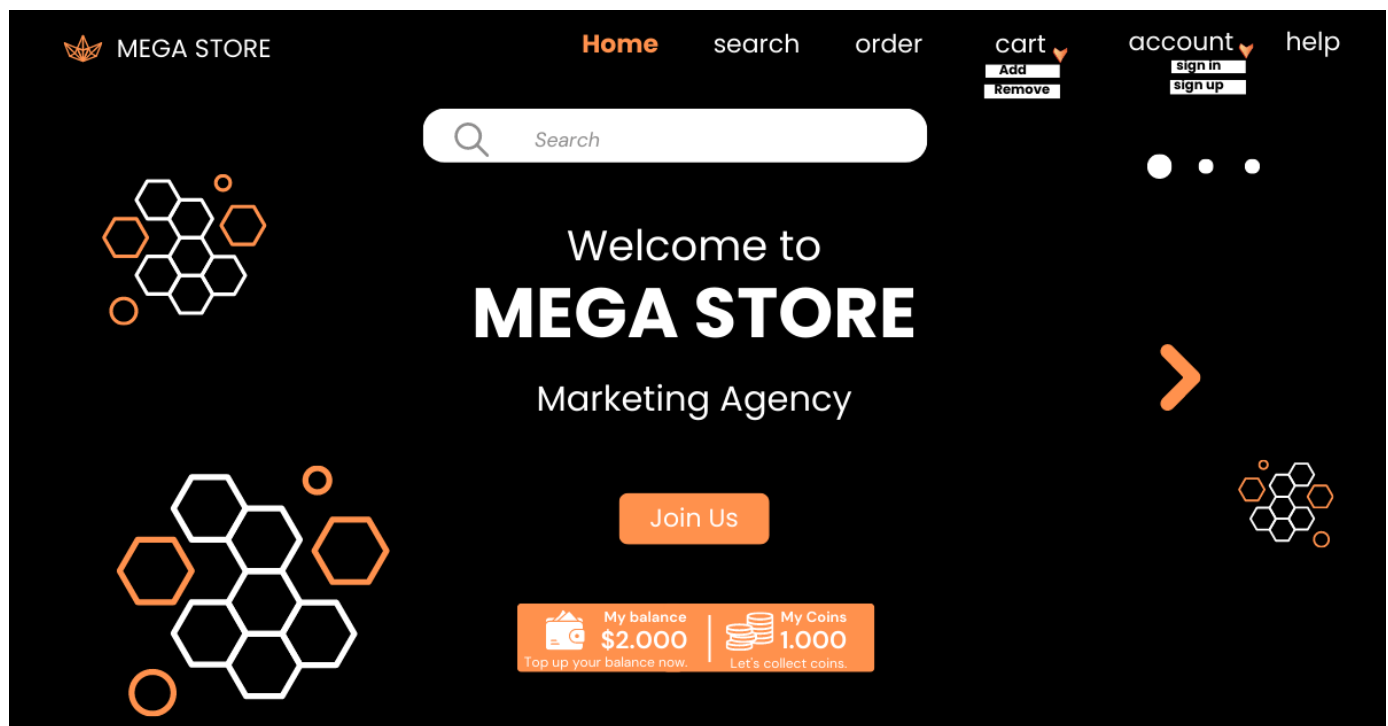

- a. Create a good menu design by following the principles you studied. This should start by defining how use case are grouped inside a menu **in a tabular format**, which is followed by the actual menu design and define which menu style will be used?

Cairo University

Course: Analysis and Design of Information Systems  
Under supervision: Dr. Iman Helal – Dr. Dina Ezzat  
Academic Year: 2022-2023

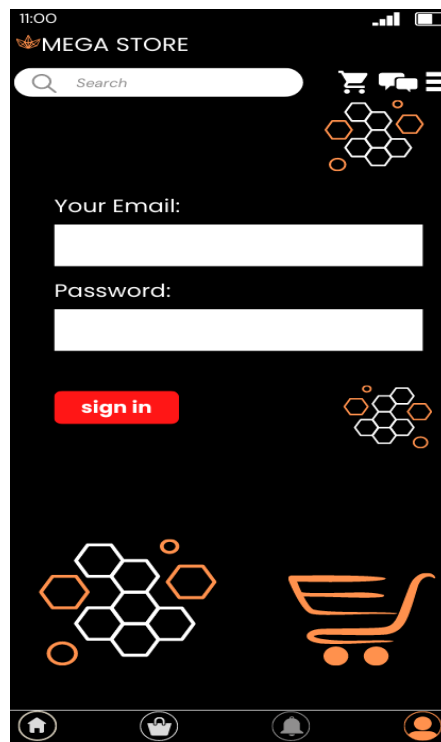

Menu (2) showing website app menu

- b. For the screens and forms identified in (2.a) create a **Storyboard** that captures the sequences of event. Storyboards may be designed using **wireframe tool or any low-fidelity** paper sketches, e.g. pencil tool, power points, etc.

### 5. Consider all User Interface Design Guidelines you studied and show how they addressed in your screens

Reports:

- Design One electronic internal output reports of your choice.
- Design One electronic external output reports of your choice.

Electronic internal report

| Customer ID | Date      | Payment Method | Products     |
|-------------|-----------|----------------|--------------|
| Ahmed_mo202 | 3/12/2020 | PayPal         | Playstation4 |
| Mahmoud22   | 5/12/2020 | Fawry          | Fresh Fish   |
| Mohamed13   | 8/12/2020 | Visa           | Calculator   |
|             |           |                |              |

Electronic external report(all what user get)

| Date      | Payment Method | Product      | Date      |
|-----------|----------------|--------------|-----------|
| 3/12/2020 | PayPal         | Playstation4 | 3/12/2020 |
| 5/12/2020 | Fawry          | Fresh fish   | 5/12/2020 |
| 8/12/2020 | Visa           | Calculator   | 8/12/2020 |
|           |                |              |           |
